

# HKILA Accredited Arborist Assessment Interview

## Section 1 – Tree Identification and Knowledge

### Introduction

Specimens or photos of 10 species will be displayed in assessment. The candidates should be able to identify the trees and palms species through live specimens or photos showing leaves, flowers &/or fruits. Answers could be in Chinese Name or Scientific names verbally.

### Assessment Criteria

Passing score is 70% questions answered correctly. In case scoring 60%, several extra questions (extra species, knowledge on brittle wood species, response on transplant shock, flowering seasons and application etc. ) will be asked by the assessor to ensure the candidate equipped with sound knowledge on plant identification. Candidates score 50% or below will be considered as fail in Section 1.
